

# ems3000 series docking station

## Data Sheet

### PART NUMBER

DOC-EMS3K

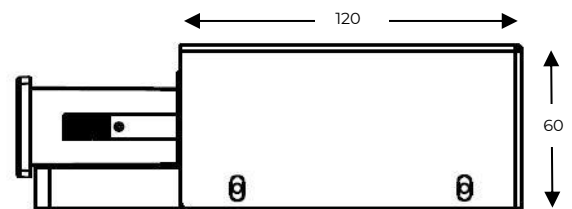

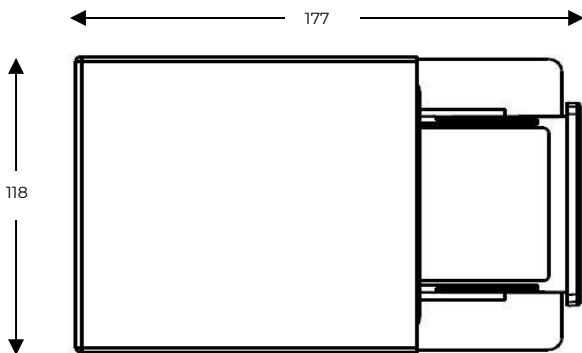

### TITLE

ems3000 series docking station

### PRODUCT DESCRIPTION

The ems3000 series docking station is used to carry out production commissioning and configuring parameters from the elstat config tool program straight to the ems3000 series controller. Production commissioning will consist of scanning the asset ID and the client ID using a barcode scanner and these will be written into the ems3000 controller during the programming process.

### DRAWING - MECHANICAL DETAILS

### SPECIFICATION

PARAMETER	VALUE
Connection type	IEC USB B
Input voltage	85 - 240VAC via IEC
Output voltage	85 - 240VAC to controller
Interface type	FTDI 3v3
Drivers	Available from elstat website
Weight	0.9kg

### MATERIAL

Black ABS plastic base where the controller sits in.  
Black Stainless steel metal top cover and rubber feet.  
Construction is very sturdy and can be used in a production environment, connections to the controller are via brass push pins which are replaceable if needed and a micro-USB. There is a safety switch fitted that removes the mains power when the controller is removed.
